

BREATHE

by Milliken™

A collection of eco-elegant sustainable fabrics

Milliken™

23,040 BREATHS A DAY

The average person takes 23,040 breaths a day. Those breaths happen in our individual, private homes. And in the larger home we all share called Earth.

BREATHE by Milliken is designed to enhance both those homes and to reflect the values and lifestyle of today's customer. Even something such as fabric can make a big difference in how we approach our world.

BREATHE IS THE ULTIMATE FABRIC FOR THE WAY YOUR FAMILY LIVES.

BREATHE IS AN EVERYDAY FABRIC WITH BENEFITS
YOU DON'T SEE EVERY DAY.

Soft and beautiful, yet durable and easy to clean.

Sustainably-designed using natural content or recycled fibers from plastic bottles.

Protects from everyday stains with a remarkable plant-based water repellent.

Fabrics are UL GREENGUARD® Gold third-party certified - one of the world's most rigorous environmental standards - thus improving indoor air quality.

INNOVATION FEELS
AT HOME HERE.™

Milliken™

Milliken has been a singular leader in fabric innovation for decades. BREATHE is just the latest example of how Milliken consistently understands the desires of the contemporary consumer while demonstrating a staunch obligation to our planet.

BREATHE by Milliken exists to enhance your home life. It does so by providing a sustainable, durable, stain-resistant fabric innovation that truly allows you to relax and breathe easy when everyday life happens in your home.
