

Applications

Seating

Milliken Specialty Interiors designs and manufactures its fabrics to be beautiful, durable and pleasing to the senses. Our solutions, whether on side chairs, sofas or lounge furniture, invite you to sit and, ultimately, help you stay comfortable no matter what you're doing. But they offer more than a good "hand"; the fabrics are designed to meet your requirements — from flame- and abrasion-resistance to crocking and UV performance — while instilling your workplace or home with warmth.

Vertical Surfaces

Your office operates more efficiently when it's designed to address individual tasks and team goals. Vertical surfaces can help foster collaboration, offer privacy and reduce ambient noise. Textiles for these surfaces from Milliken Specialty Interiors are not only functional and decorative, but our wide range of available textiles, including those for systems, benching and screens, enable design flexibility to help optimize any space.

Drapery

As a leading provider of drapery for commercial spaces, healthcare facilities, hotels and theaters throughout the country, Milliken Specialty Interiors is an expert in meeting customer specifications, including NFPA 701 flammability requirements as a core technical competency. With years of expertise in developing woven and knit fabrics that not only meet commercial guidelines but look good, Milliken Specialty Interiors is the fabric provider of choice for many top drapery manufacturers and distributors.

Bedding

Because Milliken Specialty Interiors is one of only a handful of companies in the United States that can weave wide fabrics for bedding, we offer manufacturers better cutting and sewing efficiencies and yield for top-of-bed solutions.

We also have years of expertise in providing polyester fabrics for digital printing which allow you to more easily sync with a particular brand's color scheme or print just what is needed for your next design project eliminating waste.
